TLBP-Project-Tangaroa-Blogpost-IMG-03-USS-Mississinewa-Legacy.png	USS Mississinewa (AO-59), shown afloat in 1944, sinking at Ulithi Atoll on 20 November 1944, and leaking oil from the wreck in September 2001—a visual sequence connecting her wartime loss with its continuing environmental legacy.	3	Ship afloat: U.S. Naval History and Heritage Command, NH 97279, via NavSource Naval History. Sinking photograph: SK1 Simon “Sid” Harris, U.S. Navy; U.S. Naval History and Heritage Command, NH 97981, via NavSource Naval History. Underwater photograph: U.S. Navy Supervisor of Salvage and Diving (SUPSALV). Composite prepared by The Log Book Project Ltd.	Photographs of Mississinewa afloat and sinking sourced through the NavSource Naval History archive. NavSource identifies the sinking photograph as having been taken by SK1 Simon “Sid” Harris from USS Munsee. Underwater photograph shows oil leaking from the wreck in September 2001. Published as Figure M-2 in Potentially Polluting Wrecks in Marine Waters and credited to SUPSALV. The copy used was obtained through ResearchGate.	Wartime photographs identified by NavSource as U.S. Navy/NHHC material. Underwater photograph credited in the original publication to SUPSALV. Composite prepared for Project Tangaroa publication from these identified source images.
TLBP-Project-Tangaroa-Blogpost-IMG-04-Mississinewa-Oil-Vial-and-Log-Book.png	A vial containing oil recovered from USS Mississinewa rests on Cyril Devaux’s wartime pilot’s log book, opened at the page signed by Mike Mair on behalf of his father, John A. Mair, who served aboard the fleet oiler.	6	Composite: The Log Book Project Ltd. Original photographs.	The Log Book Project archive. TLBP-Project-Tangaroa-Blogpost-IMG-05-TP001-Caribbean-Tanker-Casualties.png	Extract from the TP-001 regional screening map, showing selected tanker casualties historically recorded as carrying heavy fuel oil in the central and eastern Caribbean, together with the cargo volume with which each vessel sailed. These figures do not represent quantities confirmed as presently remaining within the wrecks.	5	Map and composite prepared by The Log Book Project Ltd.	The Log Book Project Ltd, TP-001, Phase 1 Screening of WWII Tanker Casualties, July 2026.	Approved for use by Project Tangaroa in connection with this article and its promotion. Credit and explanatory caption must be retained. The stated volumes represent the cargo with which each vessel sailed and must not be presented as quantities confirmed as presently remaining aboard the wrecks.
TLBP-Project-Tangaroa-Blogpost-IMG-06-Nick-Devaux-Malta-Workshop.png	Nick Devaux with Cyril Devaux's wartime pilot's log book at Project Tangaroa's Data and Archives workshop in Malta, March 2025—bringing the object from which TLBP's journey began into the emerging international PPW conversation.	4	Screen photograph: Lars McKie. Underlying livestream: Project Tangaroa. Image prepared by The Log Book Project Ltd.	Project Tangaroa, Data and Archives workshop, Fortress Builders Interpretation Centre, Malta, 4–6 March 2025; livestream.	Photograph taken by Lars McKie while watching the live-streamed workshop. Project Tangaroa to confirm reproduction of the underlying broadcast image on its website and in associated promotion.
